ABOUT US

Here at Sunshine Tiny Houses we have decades of combined building experience. We offer a selection of signature designs alongside bespoke design services tailored for your Modular House, Granny Flat, Studio, Office or Retreat.

Every home is built off-site in our factory, then transported and installed on your land — faster, weather-independent, and built to consistent quality standards. Each solution is crafted to perfectly match your needs, blending style with functionality for optimal living spaces. Transform your underutilised backyard space into extra living space.

As a fully licensed and insured building company, we uphold the highest standards in every aspect of our builds, employing only skilled, licensed tradespeople. We stand by our promise to deliver a superior product at a competitive price. Our commitment to your satisfaction is unwavering, from the initial design to the final handover of your beautiful, high-quality modular house.

All our constructions adhere to the National Construction Code (NCC), ensuring each Granny Flat or Studio is built to the highest standards.

From your first consultation through to final handover, we manage the entire process in-house — design, approvals, construction, delivery and installation — so you don't have to coordinate multiple contractors.

YOUR JOURNEY TO A MODULAR HOUSE

1. Choose a Design or Custom Design
2. Approvals & Building Certification
3. Start the Build
4. Install, Connections & Handover

Step-by-Step: From Concept to Completion

- Town planning (site specific)
- Council Approval - Fees
- Building Certifier
- All Site Works - Engineered footings, installation of services and earthworks (if required)
- Energy assessment - Minimum 7 stars
- Termite Barrier
- Soil Test
- Transport and Crane Services
- Structural engineering - Form 15 - Concrete footings, Floor, Wall and Roof framing.
- Installation and final Handover
- Plumbing Application with Council
- Connection of all Services

OUR PROCESS

01

Consultation

Initial meeting
Brainstorm ideas for your new home
Design to suit your lifestyle, overview of the process

02

Site Analysis

Land size + site overlays
Zone and requirements, Council regulations
Soil test
Site access / power lines
Preliminary assessment

03

Design

Choose from a variety of pre-designed layouts
Modify our existing layout to suit your needs
Materials & colour selection for interior/exterior finishes.
Custom design is available

04

Building certification

All structures in Queensland require Building Approval, confirming that the design and work meet Local Authority and Building Standards requirements. Queensland now works on Private Certification, which means your application is handled by a Private Certifier and not necessarily by Council.
Building Approval
Plumbing Approval
Septic system design

05

Engineering

Based on the soil test report, the size of the modular house and wind rating, the engineer will design:
Structure, footings and lifting points.

06

Building (off site)

Engineered floor base - to ensure a strong foundation
Engineered structure (Timber or Steel)
Engineer site visit for floor base + structure
Rough-in stage - Electrical & Plumbing
Wall linings + painting
Cabinetry install
Exterior cladding install
Fit-off stage
Final inspection and testing (plumbing and electrical)

This drawing remains property of M.J. Croft Pty Ltd - Sunshine Tiny Houses. It may not be reproduced or copied whole or in part without written authority.

OUR PROCESS

07

Site works

Site works preparation happens a few weeks prior to delivery to ensure minimal disruption to the environment.

Earthworks if required (French drain around footings), scrape ground where footings are going to go, plumbing and electrical rough in as per plan,
set up utilities (power, water, sewage)

Footings or ground screws (if suitable, site specific)

Site access / power lines / contact Energex

08

Transport, Crane and Assembly

Completed modules are carefully transported to your site and expertly assembled by our skilled team. This stage is defined by efficiency, precision, and a commitment to minimising any impact on the surrounding environment.

Transportation: Your modular home is securely delivered to the site with care and safety in mind.

On-Site Assembly: Our experts ensure that each module is flawlessly assembled, creating a seamless and polished finish.

Minimal Disruption: We use streamlined processes to reduce disruption to both the environment and the surrounding neighbourhood.

09

Final connections & Handover

Final works usually take 1-14 days post-installation, to connect all utility services and complete all construction works.

In-town power
Plumbing and drainage
Septic system & water tanks

Our team will walk you through every detail of your new modular house, ensuring your complete satisfaction.

We will provide continuous support for you to settle into your new home.

OFFICE 19.2m²

This modern modular office aims to provide a flexible, comfortable, and productive workspace solution within the dynamic and often open environments of modern offices. It was designed to be accessible, accommodating different needs and ensuring ease of use for everyone. The tall louvres and wide stacker doors provide good ventilation and adequate lighting, which are crucial for user comfort and productivity.

From $100k incl. GST

*Optional deck as an upgrade

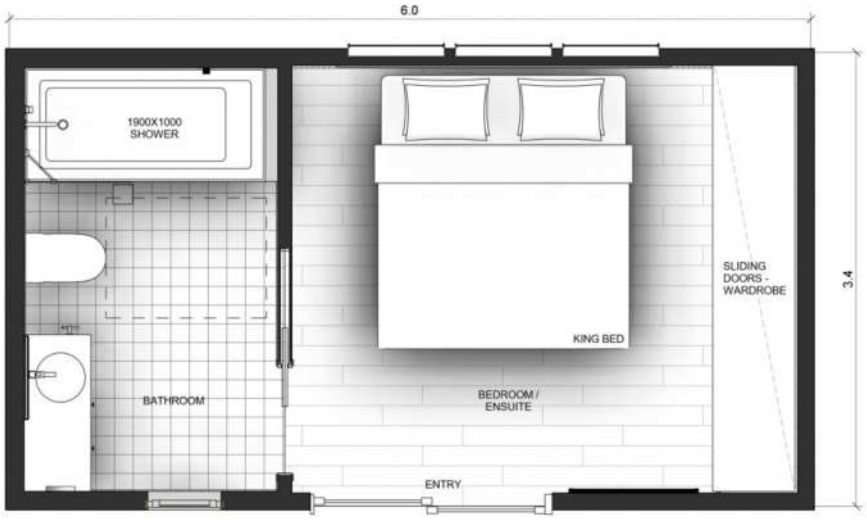

Please note, all prices are EX Factory and do not include freight, delivery, installation, council approvals, or any site works, as these are site specific.

ENSUITE 20.4m^2

This ensuite modular provides a comfortable and private living space with the convenience of an attached bathroom, suitable for installations where space is limited or where additional living accommodation is needed. An ensuite modular is particularly useful in scenarios where temporary housing or additional accommodation is needed, without extensive construction timelines or noise disruption.

From $100k incl. GST

*Optional deck as an upgrade

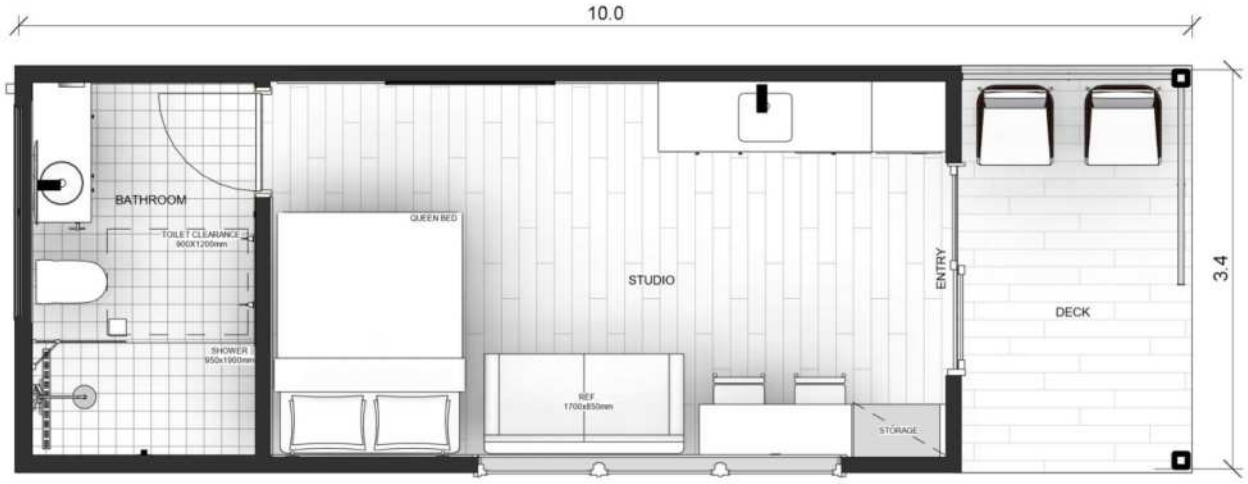

Please note, all prices are EX Factory and do not include freight, delivery, installation, council approvals, or any site works, as these are site specific.

DAHLIA 34m^2

As you step into the modern cabin/studio, you're greeted by an open, airy space filled with natural light streaming through large windows. The interior is characterised by an open layout, maximising the available square footage to create a seamless flow between the different areas. Light-coloured walls and large windows enhance the sense of space and brightness. Outside, a private balcony offers a tranquil outdoor space for enjoying fresh air and sunshine. Dahlia was designed to help with the housing shortage and for those who need extra living space for family & friends.

From $145k incl. GST

*Optional timber ceiling as an upgrade

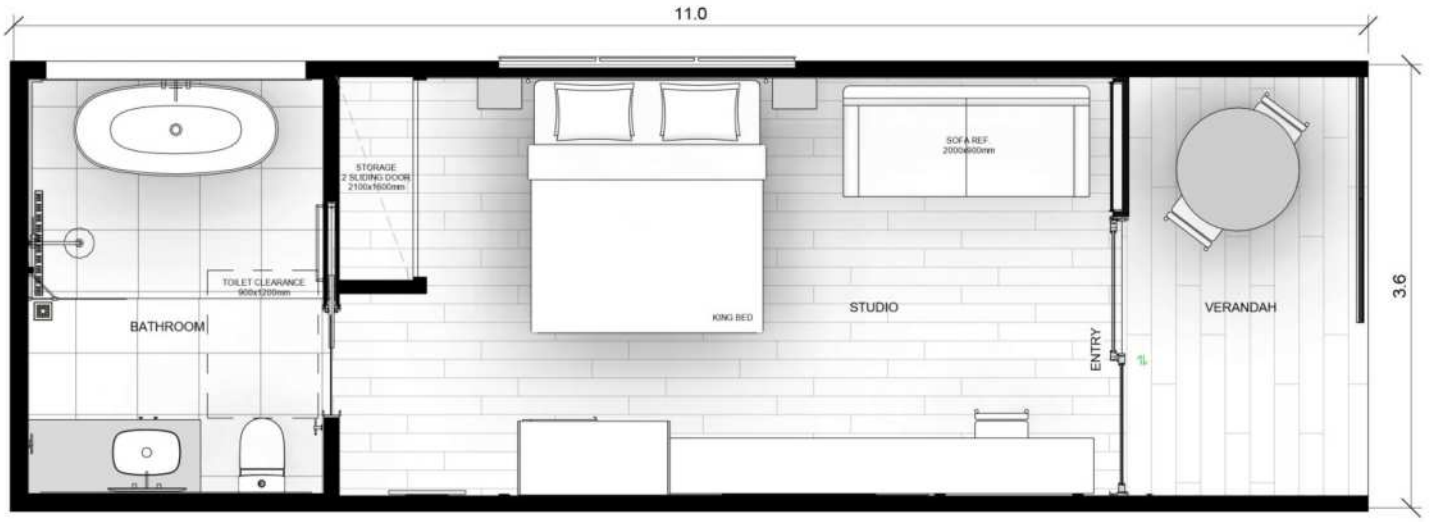

Please note, all prices are EX Factory and do not include freight, delivery, installation, council approvals, or any site works, as these are site specific.

This drawing remains property of M.J. Croft Pty Ltd - Sunshine Tiny Houses. It may not be reproduced or copied whole or in part without written authority.

RAGLAN 39.6m^2

The Raglan proves that exceptional design doesn't require a large footprint. This beautifully appointed studio features a luxurious ensuite, integrated workspace, generous storage and a private entertaining deck, creating a versatile space ideal for resorts, short-term rental accommodation, secondary dwellings or guest retreats.
A smart investment delivering comfort, style and outstanding guest appeal.

From $160k incl. GST

*Shaped window and timber feature walls and ceiling as an upgrade

Please note, all prices are EX Factory and do not include freight, delivery, installation, council approvals, or any site works, as these are site specific.

BUNYA 35m^2

Step into your own sanctuary, where every corner is designed to embrace you in warmth and comfort. This intimate living granny flat is a harmonious blend of functionality and charm, carefully curated to cater to your every need while enveloping you in a sense of tranquillity.

From $165k incl. GST

*Optional deck, external timber cladding, Heka Hoods and microcement walls, seat, niches and benchtops as an upgrade.

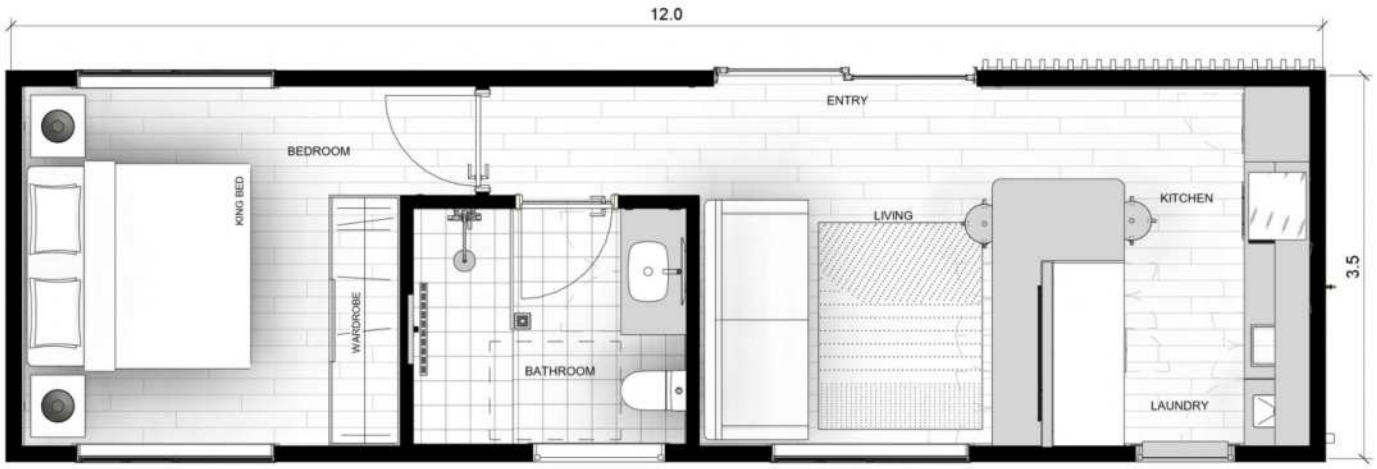

Please note, all prices are EX Factory and do not include freight, delivery, installation, council approvals, or any site works, as these are site specific.

This drawing remains property of M.J. Croft Pty Ltd - Sunshine Tiny Houses. It may not be reproduced or copied whole or in part without written authority.

RIO 42m^2

Rio, a thoughtfully designed 12 × 3.5 m, one-bedroom modular home that brings comfort and style to compact living. Warm timber tones, soft neutral finishes and large windows create an inviting interior. The clever layout features a kitchen with breakfast bar, an integrated entertainment unit, a comfortable lounge, and a separate bedroom with room for a king-size bed and built-in wardrobe. A modern bathroom and dedicated laundry space complete this practical home.
Whether you're downsizing or creating a private retreat, the Rio makes every space count.

From $180k incl. GST

*Optional deck, external timber cladding, Heka Hoods and microcement walls, seat, niches and benchtops as an upgrade.

Please note, all prices are EX Factory and do not include freight, delivery, installation, council approvals, or any site works, as these are site specific.

This drawing remains property of M.J. Croft Pty Ltd - Sunshine Tiny Houses. It may not be reproduced or copied whole or in part without written authority.

STRADDIE - 1 BEDROOM 39.9m^2

While exuding an air of cosy charm, this granny flat is also designed with practicality. Clever storage solutions maximise space efficiency, ensuring every item has its place without compromising style. Whether you're a minimalist at heart or a collector of cherished mementos, there's ample room to organise your belongings and create a clutter-free environment.

From $180k incl. GST

*Optional deck as an upgrade & combined bathroom/laundry option available.

Please note, all prices are EX Factory and do not include freight, delivery, installation, council approvals, or any site works, as these are site specific.

STRADDIE - 2 BEDROOMS

51.3m^2

While exuding an air of cosy charm, this granny flat is also designed with practicality. Clever storage solutions maximise space efficiency, ensuring every item has its place without compromising style. Whether you're a minimalist at heart or a collector of cherished mementos, there's ample room to organise your belongings and create a clutter-free environment.

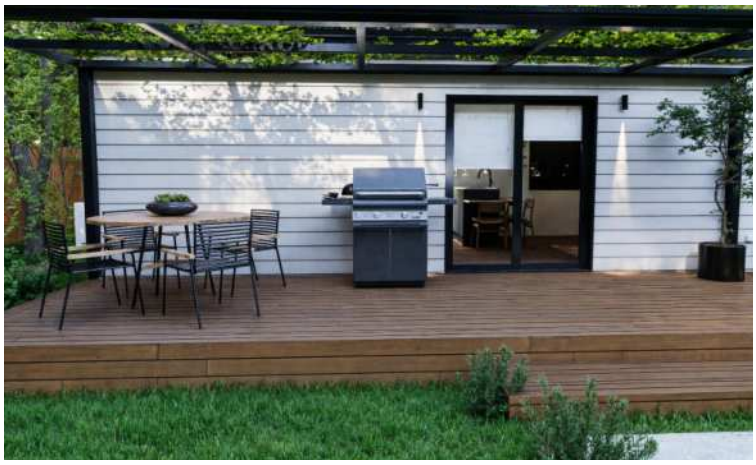

From $195k incl. GST

*Optional deck as an upgrade & combined bathroom/laundry option available.

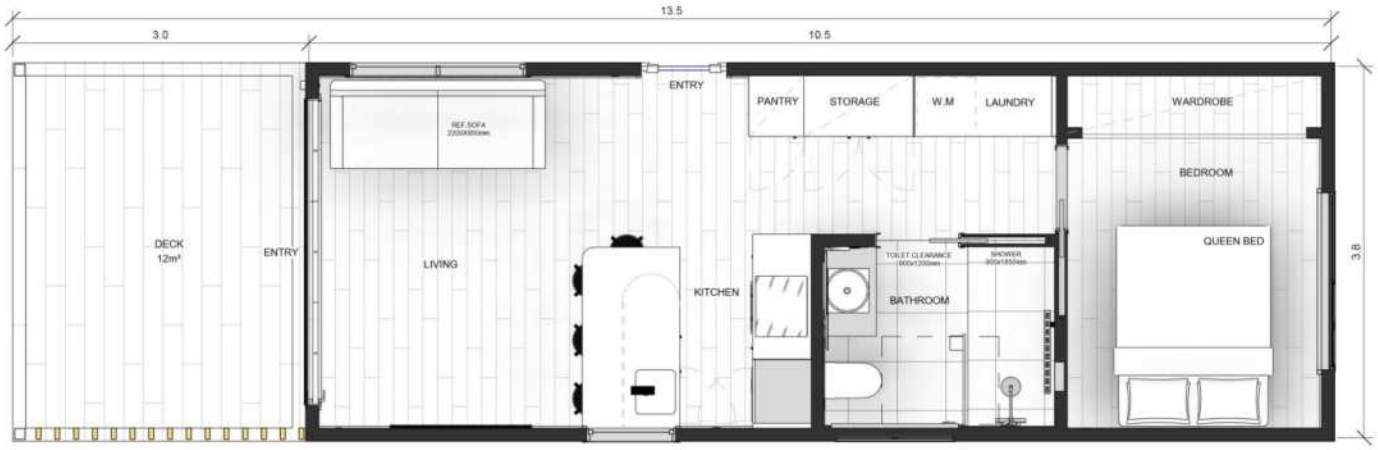

Please note, all prices are EX Factory and do not include freight, delivery, installation, council approvals, or any site works, as these are site specific.

This drawing remains property of M.J. Croft Pty Ltd - Sunshine Tiny Houses. It may not be reproduced or copied whole or in part without written authority.

PANDANUS 51.3m^2

Step inside to discover a simple yet “chic” space that radiates warmth and cosiness. The open-plan layout seamlessly combines the living, dining, and kitchen areas, creating an intimate ambience perfect for relaxation and unwinding. Step outside to discover your own private outdoor oasis, where a secluded patio beckons you to unwind amidst the beauty of nature. A cosy seating area provides the perfect spot for savouring a glass of wine or simply basking in the tranquillity of your surroundings.

From $195k incl. GST

Custom Modular House

Every great home starts with an idea.

Whether you already have detailed plans, have found a design you love, or simply have a vision in mind, our experienced in-house design team is here to bring it to life.

From the initial concept and photorealistic 3D renders through to detailed construction drawings and custom cabinetry layouts, we manage the entire design process under one roof. We'll work closely with you to create a home that reflects your lifestyle, budget, and personal style.

At Sunshine Tiny Houses, we don't believe in a one-size-fits-all approach. We welcome innovative ideas, custom layouts, premium finishes, and unique design features to create a modular home that is truly your own.

Our custom design service is $3,000 and includes your initial consultation, custom floor plans, 3D renders, detailed working drawings, cabinetry design, and up to three rounds of revisions. Best of all, this fee is fully credited towards your build when you proceed with Sunshine Tiny Houses.

Our manufacturing capabilities allow us to build modular homes from 4.8m to 15m in length and up to 4m wide.

For larger homes, multiple modules can be designed and seamlessly connected together on site, creating endless possibilities (site and transport conditions apply).

Every Sunshine Tiny Houses home is designed and built in accordance with the National Construction Code (NCC), giving you complete confidence in the quality, safety, and compliance of your investment.

Let's bring your dream modular house to life.

Get in touch with us today to discuss your dream modular house!
